Question PRINCIPLES OF MANAGEMENT	Answer1	Answer2	Answer3	Answer4	POM
principle of general management advocates that, "Employee turnover	Stability of	Remuneration of			
should be minimised to maintain organisational efficiency	personal	employees	Equity	Esprit De corps	POM
Management of insurance mobilises resources.	Material	Financial	Non-monetary	Production	POM
This technique of scientific management that helps in development of the					
concept of assembly line which is widely used in automobile companies these		Standardisation and			
days is	Motion study	simplification of work	Method study	lime study	POM
	Mechanical				
Vijay Govindarajan's a qualified	engineer	CA	Doctor	Scientist	POM
The objective of this technique of scientific management is to reduce a given			Standardisation and		
line or a product to fixed type sizes and characteristics. Name the		Differential piece	simplification of	Functional	
technique	Method study	wage system	work	foremanship	POM
Management is not absolute.	Degree	Relative	Passing	Flexible	POM
Father of Administrative management is	Peter F. Drucker.	F.W. Taylor	Henri Fayol	F. Washington	POM
TQM is doing right things	Every time	Any times	Multiple time	Right time	POM
The first and foremost function of management is	Planning	Organizing	Leading	Controlling	POM
Henry Fayol , F.W. Taylor belongs to which of the following school of					
Management.	Neoclassical school	Modern school	Classical school	Early perspective	POM
Management is process.	Social	Production	One time	Cultural	POM
Know your customer is a part ofrisk.	technical	operational	physical	mental	POM
systems should be used to share information and create common	Knowledge				
goals.	management	altered	implementation	contingent	POM
A plan is a for accomplishment.	manufacturing	forecast	sustainability	contingent	POM
Alternate plans to be used in case of failure of original plans are called					
plans.	sustainability	forecast	contingent	tactical	POM
Forecasting based on intuition is referred to asforecasting.	implementation	tactical	semi-autonomous	Genius	POM
forecasts give more accurate figures for future.	semi-autonomous	implementation	management	Combined	POM
organisation has greater flexibility as compared to that of the others.	line and staff	results	different	cost, time	POM
Organisation design begins with the creation of a	centre	strategy	charts, manuals	executive	POM
In a decentralised authority structure, more decisions are taken at					
levels.	Fewer	lower	Narrow	Graicunas	POM

Controlication is the ennesite of and efautherity	cost time	charts manuals	dispersal delegation	None of the	
Centralisation is the opposite of and of authomy.	cost, time	charts, manuals	dispersal, delegation	above	
Coordination can be achieved by contact among the responsible		task-cantered	racolve	direct	POM
Coordination should start from the very of planning process	beginning		rosolve	roscons	
Cool unitation should start nom the very or planning process.	Deginning		functional		
Irrelevant activities are eliminated in the organisation.	planning	operational	functional	divisional	
Insurance companies are based on	unity of action	unity of direction	unity of command	division of work	POM
In organisation there is a distance between policy makers and policy executors.	regional	centralised	decentralised	functional	POM
The organisation is highly flexible and is most commonly used in					
banks.	regional	functional	centralised	decentralised	POM
	delegation of				
Full fledged organisations function of the basis of	authority	flexibility	specialisation	team work	POM
Mast desirings in a contralised organizations is taken by	the tructoes	the lower level	the middle level	the top level	POM
Most decisions in a centralised organisations is taken by	framowork	managers	Indiagers	Indiagers	
Organisation framework suggests its	Traffiework	culture	ethics		
In an organisation, the structural relationships are normally shown through	graphs	charts	formula	statistics	POM
helps the manager in getting the work done from his subordinates.	Superior- subordinate relationship	Reporting system	Delegation of authority	Coordination	POM
	measurement of		identification of	determination	
The first step in designing an organisation structure is	performance	allocation of duties	activities	of objectives	POM
The last step in designing an organisation structure is	delegation of authority	measurement of performance	establishing formal reporting system		РОМ
In a/an organisation, groups are given proper official status	informal	formal	rigid	flexible	POM
is a chartered accountant by profession.	Aditya Birla	Chanda Kochhar	Naina Lal Kidwai	Narayan Murthy	POM
is the first Indian Woman to graduate from Harvard Business School.	Chanda Kochhar	Naina Lal Kidwai	Rajeshri Birla	Sudha Murthy	РОМ
In December 2012, became first woman president of FICCI.	Chanda Kochhar	Naina Lal Kidwai	Rajeshri Birla	Sudha Murthy	POM

If there are 2 groups with 50 observations each and with 25 and 35 as values of	25	30	35	40	
arithmetic means, the combined arithmetic mean of 100 observations is					
					QM
What will be the mode of 55,65,56,75,75,78,76,63 ,61 ?	56	75	Both 56 and 75	78	QM
For class intervals, the class boundaries are same as class limits.	Inclusive type	Exclusive type	Open End	For both inclusive as well as exclusive	QM
Which of the following is not a measure of central tendency?	Standard deviation	Mean	Median	Mode	QM
The classification of employees according to age and salary is classification.	Three way	Two way	One way	Four way	QM
The following average is affected by extreme values	Harmonic mean	Arithmetic mean	Geometric mean	Median.	QM
If the arithmetic mean of the two numbers X1 and X2 is 5 and if X1=3, then X2 is	3	5	7	10	QM
Source of secondary data are	From survey by a company	Statement of sales, production and wages of a national company	secret information of a government	Report and other published material of Reserve Bank	QM
The following measure of dispersion can't be calculated in case of open end class interval	Range	Mean deviation	Quartile Deviation	Standard deviation	QM
Amongst the following, which one is used to compare the dispersion in two distributions.	mode	range	mean deviation	Coefficient of range	QM
If L is the largest value and S is the smallest value of the observations, then coefficient of range =	$\frac{L-S}{L+S}$	$\frac{L+S}{L-S}$	$\frac{L+S}{2}$	$\frac{L-S}{2}$	QM
is only a rough measure of dispersion.	decile	mean deviation	standard deviation	range	QM
Interquartile range of the data is 24 then quartile deviation is	24	48	12	Can not be determined	QM
Interquartile range is	$\frac{Q_3 - Q_1}{2}$	$\frac{Q_3 + Q_1}{2}$	$Q_3 - Q_1$	$\frac{Q_3 - Q_1}{Q_3 + Q_1}$	QM
Most commonly used measure of dispersion is	range	Quartile Deviation	mean deviation	Standard Deviation	QM

Insurance can be defined as a contract between insurance company called	insured, insurer	insurer, insured	insurance giver,	insurance giver,	
and the policy holder called			insurance taker	risk taker	QM
The objective of insurance	is to make profit	is to compensate loss	depends on the point of view	is to give money to policy holder	ОМ
For annuity plans, the clients age is considered as age on	the last birthday	the next birthday	the nearer birthday	the current day	QM
The amount which an insurance company pays to policy holder after a pre- described period of time, is called	premium	insured	total sum	sum assured	QM
If values calculated for 15 pairs of x and y variables are : byx= $2/3$, r= $1/2$, s.d. of x= 3 , then s.d. of y is	2	4	1	0.4	QM
If the regression lines are perpendicular to each other, the coefficient of correlation is	zero	1	-1	2	QM
Identify the triplet of numbers representing values of two regression coefficients and correlation coefficient respectively.	1.5,1.5,1.5	1,1,1	0.5,-0.5,0.5	0.4,1.6,-0.8	QM
The correlation between number of students passing and the sales of sweets in April-June, 2011 is	positive	negative	zero	2	QM
The correlation between demand of goods and prices is	positive	negative	zero	2	QM
In case of same rank for more than one item rank is allotted.	Same	Average	Manipulated	Managed	QM
Product moment is also called	Karl Pearson's coefficient of correlation	Least squares	Moving average	Slow Averages	QM
The rank correlation coefficient between two data is given as 0.75. If the sum of the squares of the differences in their ranks is 30. The number of observations are	10	11	12	9	QM
The two regression equations for the variables x and y are 4x=y+11 and 7x=3y+18 the mean of x and y are	(1,3)	(3,3)	(1,1)	(3,1)	QM
A process by which we estimate the value of dependent variable on the basis of one or more independent variables is called	Correlation	Regression	Residual	Slope	QM
The aim of Correlation analysis is	Predicting one variable for a given value of the other variable	describing relation between two variables	Measuring the extent of relation between two variables	comparing the predicted values	QM

of correlation is a numerical measurement for the degree and	Karl Pearson's	Scatter diagram	Spearman's rank	non sense	
extent of correlation.	coefficient		correlation.	correlation	QM
[i] Probability is always less than or equal to 1. [ii] Probability is always greater	only [i] is true	only [ii] is true	[i] and [ii] are true	[i] and [ii]are	
than or equal to 0.				false	QM
If from a pack of 52 well shuffled cards ,a card is drawn, the chances of getting a	(1/4)	(1/52)	(1/3)	(1/13)	
king is					QM
If A and B are any two events associated with an experiment, then probability of	Complementary	Multiplication	Addition Theorem	Joint	
occurrence of events A or B or both A and B is given by	Probability	Theorem of	of Probability	Probability	
	Theorem	Probability		Theorem	
					QM
If A and B are independent events then, conditional probability P(B/A)	P(A) x P(B)	P(A)	P(B)	P(A) - P(B)	
=					QM
An experiment is calledexperiment if there are more than one possible	Random	Order	Sequence	Constant	
outcomes					QM
Two coins are thrown at the same time. Find the probability of getting both	3/4	1/4	1/2	0	
heads.					QM
Two dice are thrown simultaneously. The probability of getting a sum of 9 is	1/10	3/10	1/9	4/9	
					QM
A number is selected at random from first 50 natural numbers. Then the	7/50	4/25	1/25	2/25	
probability that it is a multiple of 3 and 4 is					QM
The possible situation in decision making are all known, there is of	some knowledge	complete knowledge	partial knowledge	no knowledge	
exact situation that will occur in future at the time of decision making.					
					QM
In case of pay-off table available Maximax criterion can be considered	optimistic view	pessimistic view	normal view	sadistic view	
as					QM
In case of pay-off matrix being available for decision making then maximin	optimistic view	pessimistic view	normal view	absurd	
criterion can be considered as					QM
In case of opportunity loss matrix being available for decision making then	optimistic view	pessimistic view	normal view	absurd	
minimum criterion is considered as					QM
Decision tree calculationbegins from left to right	sometimes	always	rarely	never	QM
Index numbercarries unit of measurement.	Sometimes	Always	Rarely	Never	QM
The price index numbermeasures changes in level of expenditure.	Always	Sometimes	Rarely	Never	
					QM

The quantity index numbermeasures changes in level of expenditure.	Always	Sometimes	Rarely	Never	OM
The value index number measures changes in level of consumption of	Always	Sometimes	Barely	Never	Q.111
quantity.	, invays	Sometimes	nurciy	i i ci ci	OM
Question BUSINESS ECONOMICS I	Answer1	Answer2	Answer3	Answer4	ECO
	Father of			Father of	
Adam smith is referred as the	Economics	Father of concepts	Father of tool	Zoology	ECO
The term the "rise over run" is related to	Slope	Analyse	Labour	Terms	ECO
	Explicit and		Procurement and	Outside and	
Functions can be bothand	Implicit	Arbitrary and Implicit	Arbitrary	Inside	ECO
Economics is considered as both positive and	Social	Marginal	Friction	Normative	ECO
Revenue function is an important factor on theside.	Supply	Inferior	quality	Veblen	ECO
If the price of orange juice falls the demand for apple juice will	Increase	Decrease	Remain the same	Become negative	ECO
Which of the following is not a complementary good for pen and	Refill	Paper	Notebook	Rice	ECO
Total Cost =	Quantity x Variable Cost	Price x Cost	Price x Variable	Quantity x Price	ECO
A theory may contain all but not one of the following	An unorganised collection of facts about the real world	A set of definitions of the terms used	A set of assumptions	One or more hypotheses	ECO
Business Economics is generally in nature.	Normative	Positive	Neutral	Descriptive	ECO
The quantity DD of a commodity increases from 6,000 Units to 8,000 Units due to increase in advertisement expenditure from Rs46,000 to Rs 42,000 Calculate Promotional elasticity of demand.(EA)	-3.8	-1.2	1	6	ECO
Initial price is Rs 5000 and 10,000 units are demanded . New Price is Rs 1000					
and 1500 units are demanded. Calculate price elasticity of demand,	1	5	0.5	15	ECO
The elasticity in relation to the change of the price of other goods and services is called as elasticity of demand.	Price	Income	Cross	Promotional	ECO
If two commodities are not related to each other, then cross elasticity of demand will be	positive	negative	zero	infinite	ECO

When goods demanded are used for more than one purpose is	loint Domand	Composite Domand	Derived	Direct	500
			60	20	ECO
Average Total Cost =	ΔFC +Δ\/C	TCn-TCn-1		20 TEC/O	FCO
