

Question	Answer1	Answer2	Answer3	Answer4	Correct Answer	Topic
At the _____, the literature review helps in identification and selection of the research problem.	Post-research Stage	Research Onset	In-process Research	Pre-research Stage	Answer4	Unit 1
Which one of the below is not a source of Literature Publications	Interview	Journals	Newspapers		Answer2	Unit 1
The basic responsibility of a researcher is to identify data	problem	solution	value		Answer2	Unit 1
Conclusion of the research should be based on _____ facts	emotional	imagination	believes		Answer1	Unit 1
Research examines relationship between_____ respondents	sciences	variables	data		Answer3	Unit 1
Research maintains _____ subjectivity	objectivity	connectivity	relation		Answer2	Unit 1
Research is _____process continuous	one time	last	intermittent		Answer1	Unit 1
CRISIL is the _____ rating agency in India third	fourth	first	second		Answer3	Unit 1
From _____ research a researcher finds out critical details to add new ideas.	Applied	Analytical	Empirical	Descriptive	Answer2	Unit 1
_____ research is primarily concerned with testing hypothesis and interpreting relationship by analysis the _____ research concentrates on the process of the final	Applied	Analytical	Empirical	Descriptive	Answer2	Unit 1
Research based on experimentation or observation is defined as _____ research	Applied	Analytical	Empirical	Descriptive	Answer3	Unit 1
_____ refers to mini version of a full scale study. Objectives	Schedules	Bibliography	Pilot study		Answer4	Unit 2
Pilot study is advisable to keep research _____ in order. objectives	prospects	design	outcome		Answer3	Unit 2
A supposition or guess put forward is _____.	Hypothesis	Schedules	objectives	design	Answer1	Unit 2
All the aspects of hypothesis must show _____.	unanimity	unclear	ambiguous	vague	Answer1	Unit 2
Complex hypothesis work at higher level of _____.	abstraction	Cause	Explanation	working	Answer1	Unit 2
_____ enables to arrive at systematic method problem	solution	knowledge	variable		Answer3	Unit 2
Example for fact finding study is _____	Pure research	survey	Action research	Long term research	Answer2	Unit 2
_____ is needed in order to execute the research work/project in orderly manner	research problem	research design	research objective	research plan	Answer2	Unit 2
A good research design should be _____.	Confirm	Fixed	Rigid	Flexible	Answer4	Unit 2
Good research adopts _____ effectiveness. cost	revenue	income	payment		Answer1	Unit 2
The process of editing, presenting collected information is termed as _____.	Drafting questions	Preparation of obje	Analysis of data	Interpretation	Answer3	Unit 2
Code A1, Code A2, Code A3 is an example of _____	Numerical codes	Alphabetical codes	Alpha-numerical codes	Special codes	Answer3	Unit 3
_____ contains the source of every reference incorporated in the research report.	Bibliography	Footnotes	Conclusion	Abstract	Answer1	Unit 3
Code A, Code B, Code C is an example of _____.	Numerical codes	Alphabetical codes	Alpha-numerical codes	Special codes	Answer2	Unit 3
	people	employees	variables	customers	Answer3	Unit 3

_____ editing is editing of data at record level.	Major	Minor	Micro	Macro	Answer3	Unit 3
_____ editing is editing of data after data is	Major	Micro	Macro	Minor	Answer4	Unit 3
The following analysis determines a cause for an	Descriptive	Correlation	Inferential	Causal	Answer4	Unit 3
Studying the effect of two or more predictors on				Multidimensional		
certain evaluation criterion is:	Discriminant Analysis	Beta Analysis	Cluster Analysis	scaling	Answer1	Unit 3
Formula of Personian correlation coefficient was						
developed by British Biometrician _____ Pearson.	Karen	Karl	Mark	Mike	Answer2	Unit 3
				Descriptive		
Linear relationship between two variables is called as:	Regression analysis	Cluster analysis	Correlation analysis	Analysis	Answer3	Unit 3
_____ analysis is used to describe what's going	Descriptive	Regression	Cluster	Correlation	Answer1	Unit 3
Which of the following is a type of random sampling?	Convenience	Judgemental	Stratified	Quota	Answer3	Unit 3
Which of the following is a type of non-random	Multistage	Stratified	Cluster	Quota	Answer4	Unit 3
The mode for the following dataset is: 1, 2, 2, 3, 4, 5,		1	2	3	4	Answer1
The median for the following dataset is:		30	50	70	90	Answer2
The mean for the following dataset is: 2,4,6,8,10,3,2		3	4	5	6	Answer3
Correlation analysis is conducted by drawing a graph						
of the two series under study. Such graph is called as	Pie chart	Histogram	Dindogram	Scatter plot	Answer4	Unit 3
_____ cause analysis reveals the cause in the						
whole system.	systematic	singular	unique	circular	Answer1	Unit 3
_____ is designed for publication in a professional						
journal.	Report	research staff	Research abstract	Research article	Answer4	Unit 4
Bibliography is included in the _____ of the						
report.	Preliminary contents	Main Body	Concluding part	Recommendation	Answer3	Unit 4
Technical report is otherwise called _____.	Popular Report	Interim Report	Thesis	Summary Report	Answer3	Unit 4
A short summary of Technical Report is called	Article	Abstract	Publication	Guide	Answer2	Unit 4
_____ is called publication in a Research	Guide	Popular Report	Research abstract	Format	Answer3	Unit 4
Ph.D. stands for _____.	Doctor of Philosophy	Degree in Philosoph	Doctor of Psychology	Degree in Psychology	Answer1	Unit 4
Bibliography means _____.	Footnote	Quotations	Lists of Books referred	Biography	Answer4	Unit 4
The argumentation becomes a closed system in	Inductive	Deductive	Fallacious	Intuitive	Answer2	Unit 4
The appendix includes copies of _____.						
	Footnote	Name of authors	glossary	Title of the books.	Answer3	Unit 4
Appendix is followed by _____.						
	Recommendations	Bibliography	Signature of the reporter	Conclusions	Answer2	Unit 4
_____ designed for publication in a professional	Interim report	Summary report	Technical report	Research article	Answer4	Unit 4
The last phase of the journey of research activity is writing	Collecting data	Report	Analysing of data	Interpretation	Answer2	Unit 4
of the _____.
