First aid is the immediate care of an injured or suddenly sick person. It is the care a person applies as soon as possible after an accident or sudden illness. This prompt care and attention prior to the arrival of the ambulance can sometimes mean the difference between life and death or between a full or partial recovery.

#### Objectives of this workshop:

- To contribute towards increasing the awareness of Basic First Aid and safety
- To provide basic trainings to the students in times of first aid need such as:
  - to give immediate care.
  - to protect the casualty from further harm.
  - to relieve pain.
  - to promote recovery.

There was a huge crowd of participants in Workshop. The First Aid Training went on with practical demonstrations on Types of First AID issues, Cases which require First AID, Methods that are involved in First AID and Importance of First Aid

At V.P.M we believe in protecting life and health and to ensure respect for the human being. It promotes mutual understanding, friendship, cooperation, and lasting peace amongst all peoples.
