Report on Industrial visit

Date: 01/03/2023

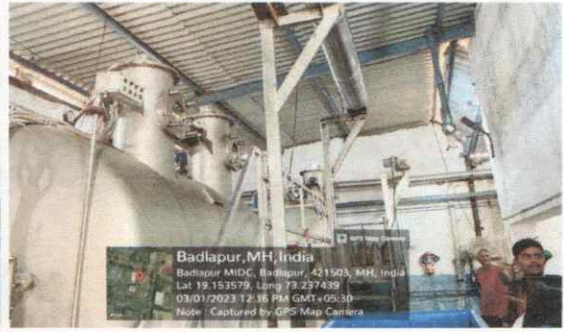

Venue: Subhalaxmi Knitfab (Badlapur)

The visit started off with the students of SY and TY of General Science students meet up on Badlapur Station along with Dr.Bhavini Dand and Ms.Aditi Chaubey. From station we took a share rickshaw and started with our visit to Shubhlaxmi Knitfab also known as Subhalaxmi Colours. After reaching Mr. Amit Mishra (Manager) was introduced to us by Dr.Bhavini Dand and then Sir introduced us to Yarn Processing machine where a cloth of about 20 kg was prepared and bundled each. Sir explained us detailed process of yarn being converted to a white fabric bunch. Later we were taken to the office where sample clothes made from their fabric was shown. This included some modification and we were introduced to different types of cloth material and even their applications.

On Request of Dr.Bhavini Dand and Ms.Aditi Chaubey , Mr. Amit Mishra Sir took us to the Dyeing Industry which belonged to same industry. We were introduced and explained about various processes taking place in dyeing industry like washing of cloth, dyeing, squeezing, drying and final effluent treatment of the wastage produced. To explain a few, infracolour instrument is used for sample dyeing using 5gram of dye on sample cloth, in the squeezing machine the washed fabric was squeezed to dry it to about 60% and then the remaining 40% was removed by drying it through hot tube technique and many more. Also, they did let us know effluent treatment and dosing process with proper explanation from start.

Students were active throughout the visit and even they did ask questions and got each query cleared by industrial expert. Necessary procedure was done by Dr. Bhavini Dand and the knowledgeable Industrial Visit ended with lunch in Archana restaurant near Badlapur station. Students and Teachers headed towards their home through train. Industrial visit turned out to be knowledgeable experience for students.
