SEMESTER III

| B. Sc. (Information Tech | nnology) | Semeste | er – III |
|---|---------------------------|---------|--------------|
| Course Name: Python Programming | | | ode: USIT301 |
| Periods per week (1 Period is 50 minutes) | | 5 | |
| Credits | | 2 | |
| | | Hours | Marks |
| Evaluation System | Theory Examination | 21/2 | 75 |
| | Internal | | 25 |

| Unit | Details | Lectures |
|------|---|----------|
| Ι | Introduction: The Python Programming Language, History, features, | |
| | Installing Python, Running Python program, Debugging : Syntax | |
| | Errors, Runtime Errors, Semantic Errors, Experimental Debugging, | |
| | Formal and Natural Languages, The Difference Between Brackets, | |
| | Braces, and Parentheses, | |
| | Variables and ExpressionsValues and Types, Variables, Variable | 12 |
| | Names and Keywords, Type conversion, Operators and Operands, | |
| | Expressions, Interactive Mode and Script Mode, Order of Operations. | |
| | Conditional Statements: if, if-else, nested if –else | |
| | Looping: for, while, nested loops | |
| II | Control statements: Terminating loops, skipping specific conditions | |
| 11 | Functions: Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions, Definitions and | |
| | Uses, Flow of Execution, Parameters and Arguments, Variables and | |
| | Parameters Are Local, Stack Diagrams, Fruitful Functions and Void | |
| | Functions, Why Functions?Importing with from, Return Values, | |
| | Incremental Development, Composition, Boolean Functions, More | 12 |
| | Recursion, Leap of Faith, Checking Types | 12 |
| | Strings: A String Is a Sequence, Traversal with a for Loop, String | |
| | Slices, Strings Are Immutable, Searching, Looping and Counting, | |
| | String Methods, The in Operator, String Comparison, String | |
| | Operations. | |
| III | Lists: Values and Accessing Elements, Lists are mutable, traversing a | |
| | List, Deleting elements from List, Built-in List Operators, | |
| | Concatenation, Repetition, In Operator, Built-in List functions and | |
| | methods | |
| | Tuples and Dictionaries : Tuples, Accessing values in Tuples, Tuple | |
| | Assignment, Tuples as return values, Variable-length argument tuples, | |
| | Basic tuples operations, Concatenation, Repetition, in Operator, | 12 |
| | Iteration, Built-in Tuple Functions | 14 |
| | Creating a Dictionary, Accessing Values in a dictionary, Updating | |
| | Dictionary, Deleting Elements from Dictionary, Properties of | |
| | Dictionary keys, Operations in Dictionary, Built-In Dictionary | |
| | Functions, Built-in Dictionary Methods | |
| | Files: Text Files, The File Object Attributes, Directories | |
| | Exceptions: Built-in Exceptions, Handling Exceptions, Exception | |

| | with Arguments, User-defined Exceptions | |
|----|---|----|
| IV | Regular Expressions – Concept of regular expression, various types of regular expressions, using match function. Classes and Objects: Overview of OOP (Object Oriented Programming), Class Definition, Creating Objects, Instances as Arguments, Instances as return values, Built-in Class Attributes, Inheritance, Method Overriding, Data Encapsulation, Data Hiding Multithreaded Programming: Thread Module, creating a thread, synchronizing threads, multithreaded priority queue Modules: Importing module, Creating and exploring modules, Math module, Random module, Time module | 12 |
| V | Creating the GUI Form and Adding Widgets: Widgets: Button, Canvas, Checkbutton, Entry, Frame, Label, Listbox, Menubutton, Menu, Message, Radiobutton, Scale, Scrollbar, text, Toplevel, Spinbox, PanedWindow, LabelFrame, tkMessagebox. Handling Standard attributes and Properties of Widgets. Layout Management: Designing GUI applications with proper Layout Management features. Look and Feel Customization:Enhancing Look and Feel of GUI using different appearances of widgets. Storing Data in Our MySQL Database via Our GUI :Connecting to a MySQL database from Python, Configuring the MySQL connection, Designing the Python GUI database, Using the INSERT command, Using the UPDATE command, Using the DELETE command, Storing and retrieving data from MySQL database. | 12 |

| | Internal | | 25 |

| Unit | Details | Lectures |
|------|---|----------|
| I | Introduction: Data and Information, Data Structure, Classification of Data Structures, Primitive Data Types, Abstract Data Types, Data structure vs. File Organization, Operations on Data Structure, Algorithm, Importance of Algorithm Analysis, Complexity of an Algorithm, Asymptotic Analysis and Notations, Big O Notation, Big Omega Notation, Big Theta Notation, Rate of Growth and Big O Notation. Array:Introduction, One Dimensional Array, Memory Representation of One Dimensional Array, Traversing, Insertion, Deletion, Searching, Sorting, Merging of Arrays, Multidimensional Arrays, General Multi-Dimensional Arrays, Sparse Arrays, SparseMatrix, Memory Representation of Special kind of Matrices, Advantages and Limitations of Arrays. | 12 |
| II | Linked List: Linked List, One-way Linked List, Traversal of Linked List, Searching, Memory Allocation and De-allocation, Insertion in Linked List, Deletion from Linked List, Copying a List into Other List, Merging Two Linked Lists, Splitting a List into Two Lists, Reversing One way linked List, Circular Linked List, Applications of Circular Linked List, Two way Linked List, Traversing a Two way Linked List, Searching in a Two way linked List, Insertion of an element in Two way Linked List, Deleting a node from Two way Linked List, Header Linked List, Applications of the Linked list, Representation of Polynomials, Storage of Sparse Arrays, Implementing other Data Structures. | 12 |
| III | Stack: Introduction, Operations on the Stack Memory Representation of Stack, Array Representation of Stack, Applications of Stack, Evaluation of Arithmetic Expression, Matching Parenthesis, infix and postfix operations, Recursion. Queue: Introduction, Queue, Operations on the Queue, Memory Representation of Queue, Array representation of queue, Linked List Representation of Queue, Circular Queue, Some special kinds of queues, Deque, Priority Queue, Application of Priority Queue, Applications of Queues. | 12 |
| IV | Sorting and Searching Techniques Bubble, Selection, Insertion, Merge Sort. Searching: Sequential, | 12 |

| | Binary, Indexed Sequential Searches, Binary Search. Tree:Tree,Binary Tree, Properties of Binary Tree, Memory Representation of Binary Tree, Operations Performed on Binary Tree,Reconstruction of Binary Tree from its Traversals, Huffman Algorithm, Binary Search Tree, Operations on Binary Search Tree, Heap, Memory Representation of Heap, Operation on Heap, Heap Sort. Advanced Tree Structures:Red Black Tree, Operations Performed | |
|---|---|----|
| | on Red Black Tree, AVL Tree, Operations performed on AVL Tree, 2-3 Tree, B-Tree. | |
| V | Hashing Techniques Hash function, Address calculation techniques, Common hashing functions Collision resolution, Linear probing, Quadratic,Double hashing, Buckethashing, Deletion and rehashing Graph: Introduction, Graph, Graph Terminology, Memory Representation of Graph, Adjacency Matrix Representation of Graph, Adjacency List or Linked Representation of Graph, Operations Performed on Graph, GraphTraversal, Applications of the Graph, Reachability, Shortest Path Problems, Spanning Trees. | 12 |

| | | Hours | Marks |
| Evaluation System | Theory Examination | 2 ¹ / ₂ | 75 |
| | Internal | | 25 |

| Unit | Details | Lectures |
|------|---|----------|
| I | Introduction: Data communications, networks, network types, Internet history,standards and administration. Network Models:Protocol layering, TCP/IP protocol suite, The OSI model. Introduction to Physical layer:Data and signals, periodic analog signals, digital signals, transmission impairment, data rate limits, performance. Digital and Analog transmission: Digital-to-digital conversion, analog-to-digital conversion, transmission modes, digital-to-analog | 12 |
| II | conversion, analog-to-analog conversion. Bandwidth Utilization: Multiplexing and SpectrumSpreading: Multiplexing, Spread Spectrum Transmission media:Guided Media, Unguided Media Switching: Introduction, circuit switched networks, packet switching, structure of a switch. Introduction to the Data Link Layer:Link layer addressing, Data Link Layer Design Issues, Error detection and correction, block coding, cyclic codes, checksum, forward error correction, error correcting codes, error detecting codes. | 12 |
| III | Data Link Control: DLC services, data link layer protocols, HDLC, Point-to-point protocol. Media Access Control: Random access, controlled access, channelization, Wired LANs – Ethernet Protocol, standard ethernet, fast ethernet, gigabit ethernet, 10 gigabit ethernet, Wireless LANs: Introduction, IEEE 802.11 project, Bluetooth, WiMAX, Cellular telephony, Satellite networks. Connecting devices and Virtual LANs. | 12 |
| IV | Introduction to the Network Layer: Network layer services, packet switching, network layer performance, IPv4 addressing, forwarding of IP packets, Internet Protocol, ICMPv4, Mobile IP Unicast Routing:Introduction, routing algorithms, unicast routing protocols. Next generation IP: IPv6 addressing, IPv6 protocol, ICMPv6 protocol, transition from IPv4 to IPv6. | 12 |
| V | Introduction to the Transport Layer : Introduction, Transport layer protocols (Simple protocol, Stop-and-wait protocol, Go-Back-n protocol, Selective repeat protocol, Bidirectional protocols), Transport | 12 |

| ſ | layer services, User datagram protocol, Transmission control protocol, | |
|---|--|--|
| | Standard Client0Server Protocols:World wide-web and HTTP, | |
| | FTP, Electronic mail, Telnet, Secured Shell, Domain name system. | |

|------|---|----------|
| Ι | Introduction to Databases and Transactions | |
| | What is database system, purpose of database system, view of data, relationaldatabases, database architecture, transaction management Data Models The importance of data models, Basic building blocks, Business rules, The evolution of data models, Degrees of data abstraction. Database Design, ER Diagram and Unified Modeling Language Database design and ER Model:overview, ERModel, Constraints, ERDiagrams, ERDIssues, weak entity sets, Codd's rules, Relational | 12 |
| п | Schemas, Introduction to UML Relational database model: | |
| | Logical view of data, keys, integrity rules, Relational Database design: features of good relational database design, atomic domain and Normalization (1NF, 2NF, 3NF, BCNF). Relational Algebra and Calculus Relational algebra: introduction, Selection and projection, set operations, renaming, Joins, Division, syntax, semantics. Operators, grouping and ungrouping, relational calculus, Domain relational Calculus, calculus vsalgebra, computational capabilities | 12 |
| III | Constraints, Views and SQL | |
| | Constraints, types of constrains, Integrity constraints, Views: Introduction to views, data independence, security, updates on views, comparison between tables and views SQL: data definition, aggregate function, Null Values, nested sub queries, Joined relations. Triggers. | 12 |
| IV | Transaction management and Concurrency | |
| | Control Transaction management: ACID properties, serializability and concurrency control, Lock based concurrency control (2PL, Deadlocks),Time stamping methods, optimistic methods, database recovery management. | 12 |
| V | PL-SQL : Beginning with PL / SQL,Identifiers and Keywords, Operators, Expressions, Sequences,Control Structures, Cursors and Transaction,Collections and composite data types, Procedures and Functions, Exceptions Handling,Packages,With Clause and Hierarchical Retrieval,Triggers. | 12 |

| Unit | Details | Lectures |
|------|--|----------|
| Ι | Matrices: Inverse of a matrix, Properties of matrices, Elementary Transformation, Rank of Matrix, Echelon or Normal Matrix, Inverse of matrix, Linear equations, Linear dependence and linear independence of vectors, Linear transformation, Characteristics roots and characteristics vectors, Properties of characteristic vectors, Caley- Hamilton Theorem, Similarity of matrices, Reduction of matrix to a diagonal matrix which has elements as characteristics values. Complex Numbers: Complex number, Equality of complex numbers, Graphical representation of complex number(Argand's Diagram), Polar form of complex numbers, Polar form of x+iy for different signs of x,y, Exponential form of complex numbers, Mathematical operation with complex numbers and their representation on Argand's Diagram, Circular functions of complex angles, Definition of hyperbolic function, Relations between circular and hyperbolic functions, Inverse hyperbolic functions, Differentiation and Integration, Graphs of the hyperbolic functions, Logarithms of complex quality, j(=i)as an operator(Electrical circuits) | 12 |
| Π | Equation of the first order and of the first degree: Separation of variables, Equations homogeneous in x and y, Non-homogeneous linear equations, Exact differential Equation, Integrating Factor, Linear Equation and equation reducible to this form, Method of substitution. Differential equation of the first order of a degree higher than the first: Introduction, Solvable for p (or the method of factors), Solve for y, Solve for x, Clairaut's form of the equation, Methods of Substitution, Method of Substitution. Linear Differential Equations with Constant Coefficients: Introduction, The Differential Operator, Linear Differential Equation f(D) $y = 0$, Different cases depending on the nature of the root of the equation $f(D) = 0$, Linear differential equation $f(D) y = X$, The complimentary Function, The inverse operator $1/f(D)$ and the symbolic expiration for the particular integral $1/f(D) X$; the general methods, Particular integral : Short methods, Particular integral : Other methods, Differential equations reducible to the linear differential equations with constant coefficients. | 12 |
| III | The Laplace Transform: Introduction, Definition of the Laplace Transform, Table of Elementary Laplace Transforms, Theorems on | 12 |

| | Important Properties of Laplace Transformation, First Shifting | | | |
|----|---|----|--|--|
| | Theorem, Second Shifting Theorem, The Convolution Theorem, | | | |
| | Laplace Transform of an Integral, Laplace Transform of Derivatives, | | | |
| | Inverse Laplace Transform: Shifting Theorem, Partial fraction | | | |
| | Methods, Use of Convolution Theorem, Solution of Ordinary Linear | | | |
| | Differential Equations with Constant Coefficients, Solution of | | | |
| | Simultaneous Ordinary Differential Equations, Laplace | | | |
| | Transformation of Special Function, Periodic Functions, Heaviside | | | |
| | Unit Step Function, Dirac-delta Function(Unit Impulse Function), | | | |
| IV | Multiple Integrals: Double Integral, Change of the order of the | | | |
| | integration, Double integral in polar co-ordinates, Triple integrals. | 12 | | |
| | Applications of integration: Areas, Volumes of solids. | | | |
| V | Beta and Gamma Functions – Definitions, Properties and Problems. | | | |
| | Duplication formula. | 10 | | |
| | Differentiation Under the Integral Sign | 12 | | |
| | Error Functions | | | |

| List of | Practical | | |
|---------|--|--|--|
| 1. | Write the program for the following: | | |
| a. | Create a program that asks the user to enter their name and their age. Print out a | | |
| | message addressed to them that tells them the year that they will turn 100 years | | |
| | old. | | |
| b. | Enter the number from the user and depending on whether the number is even or | | |
| | odd, print out an appropriate message to the user. | | |
| с. | Write a program to generate the Fibonacci series. | | |
| d. | Write a function that reverses the user defined value. | | |
| e. | Write a function to check the input value is Armstrong and also write the | | |
| | function for Palindrome. | | |
| f. | Write a recursive function to print the factorial for a given number. | | |
| | | | |
| 2. | Write the program for the following: | | |
| a. | Write a function that takes a character (i.e. a string of length 1) and returns True | | |
| | if it is a vowel, False otherwise. | | |
| b. | Define a function that computes the <i>length</i> of a given list or string. | | |
| с. | Define a <i>procedure</i> histogram() that takes a list of integers and prints a | | |
| | histogram to the screen. For example, histogram([4, 9, 7]) should print the | | |
| | following: | | |
| | * * * * | | |
| | **** | | |
| | ***** | | |
| | | | |
| 3. | Write the program for the following: | | |
| a. | A pangram is a sentence that contains all the letters of the English alphabet at | | |
| | least once, for example: The quick brown fox jumps over the lazy dog. Your task | | |
| | here is to write a function to check a sentence to see if it is a pangram or not. | | |
| b. | Take a list, say for example this one: | | |
| | a=[1,1,2,3,5,8,13,21,34,55,89] | | |
| | a-[1,1,2,3,3,0,13,21,31,33,07] | | |
| | and write a program that prints out all the elements of the list that are less than 5. | | |
| | | | |
| | | | |

| 4. | Write the program for the following: |
|----------------|---|
| a. | Write a program that takes two lists and returns True if they have at least one |
| | common member. |
| b. | Write a Python program to print a specified list after removing the 0th, 2nd, 4th |
| | and 5th elements. |
| с. | Write a Python program to clone or copy a list |
| | |
| 5. | Write the program for the following: |
| a. | Write a Python script to sort (ascending and descending) a dictionary by value. |
| b. | Write a Python script to concatenate following dictionaries to create a new one. |
| | Sample Dictionary : |
| | dic1= $\{1:10, 2:20\}$ |
| | $dic2=\{3:30, 4:40\}$ |
| | $dic3 = \{5:50, 6:60\}$ |
| | Expected Result : {1: 10, 2: 20, 3: 30, 4: 40, 5: 50, 6: 60} |
| с. | Write a Python program to sum all the items in a dictionary. |
| | |
| 6. | Write the program for the following: |
| a. | Write a Python program to read an entire text file. |
| b. | Write a Python program to append text to a file and display the text. |
| с. | Write a Python program to read last n lines of a file. |
| | |
| 7 | Write the program for the following: |
| 7. | Write the program for the following: |
| 7. a. | Design a class that store the information of student and display the same |
| - | |
| a. | Design a class that store the information of student and display the same |
| a. b. | Design a class that store the information of student and display the same Implement the concept of inheritance using python Create a class called Numbers, which has a single class attribute called MULTIPLIER, and a constructor which takes the parameters x and y (these should |
| a. b. | Design a class that store the information of student and display the same Implement the concept of inheritance using python Create a class called Numbers, which has a single class attribute called MULTIPLIER, and a constructor which takes the parameters x and y (these should all be numbers). |
| a. b. | Design a class that store the information of student and display the same Implement the concept of inheritance using python Create a class called Numbers, which has a single class attribute called MULTIPLIER, and a constructor which takes the parameters x and y (these should all be numbers). i. Write a method called add which returns the sum of the attributes x and y. |
| a. b. | Design a class that store the information of student and display the same Implement the concept of inheritance using python Create a class called Numbers, which has a single class attribute called MULTIPLIER, and a constructor which takes the parameters x and y (these should all be numbers). i. Write a method called add which returns the sum of the attributes x and y. ii. Write a class method called multiply, which takes a single number |
| a. b. | Design a class that store the information of student and display the same Implement the concept of inheritance using python Create a class called Numbers, which has a single class attribute called MULTIPLIER, and a constructor which takes the parameters x and y (these should all be numbers). i. Write a method called add which returns the sum of the attributes x and y. ii. Write a class method called multiply, which takes a single number parameter a and returns the product of a and MULTIPLIER. |
| a. b. | Design a class that store the information of student and display the same Implement the concept of inheritance using python Create a class called Numbers, which has a single class attribute called MULTIPLIER, and a constructor which takes the parameters x and y (these should all be numbers). i. | | to importyour own module like this: |
|-----|--|
| | importgeometry |
| | Try and add print dir(geometry) to the file and run it. |
| | Now write a function pointyShapeVolume(x, y, squareBase) that calculates the volume of a square pyramid if squareBase is True and of a right circular cone if squareBase is False. x is the length of an edge on a square if squareBase is True and the radius of a circle when squareBase is False. y is the height of the object. First use squareBase to distinguish the cases. Use the circleArea and squareArea from the geometry module to calculate the base areas. |
| b. | Write a program to implement exception handling. |
| | |
| 9. | Write the program for the following: |
| a. | Try to configure the widget with various options like: bg="red", family="times", size=18 |
| b. | Try to change the widget type and configuration options to experiment with other widget types like Message, Button, Entry, Checkbutton, Radiobutton, Scale etc. |
| | |
| 10. | Design the database applications for the following: |
| a. | Design a simple database application that stores the records and retrieve the |
| | same. |
| b. | Design a database application to search the specified record from the database. |
| с. | Design a database application to that allows the user to add, delete and modify |
| | the records. |

| List of | Practical |
|-----------|--|
| 1. | Implement the following: |
| a. | Write a program to store the elements in 1-D array and perform the operations |
| | like searching, sorting and reversing the elements. [Menu Driven] |
| b. | Read the two arrays from the user and merge them and display the elements in |
| | sorted order.[Menu Driven] |
| с. | Write a program to perform the Matrix addition, Multiplication and Transpose |
| | Operation. [Menu Driven] |
| 2. | Implement the following for Linked List: |
| a. | Write a program to create a single linked list and display the node elements in |
| | reverse order. |
| b. | Write a program to search the elements in the linked list and display the same |
| с. | Write a program to create double linked list and sort the elements in the linked |
| | list. |
| | |
| 3. | Implement the following for Stack: |
| a. | Write a program to implement the concept of Stack with Push, Pop, Display and |
| 1 | Exit operations. |
| b. | Write a program to convert an infix expression to postfix and prefix conversion. |
| с. | Write a program to implement Tower of Hanoi problem. |
| 4. | Implement the following for Queue: |
| a. | Write a program to implement the concept of Queue with Insert, Delete, Display |
| | and Exit operations. |
| b. | Write a program to implement the concept of Circular Queue |
| с. | Write a program to implement the concept of Deque. |
| 5. | Implement the following sorting techniques: |
| a. | Write a program to implement bubble sort. |
| b. | Write a program to implement selection sort. |
| с. | Write a program to implement insertion sort. |
| | |
| <u>6.</u> | Implement the following data structure techniques: |
| a. | Write a program to implement merge sort. |
| b. | Write a program to search the element using sequential search. |

| с. | Write a program to search the element using binary search. |
|-----|---|
| 7. | Implement the following data structure techniques: |
| a. | Write a program to create the tree and display the elements. |
| b. | Write a program to construct the binary tree. |
| с. | Write a program for inorder, postorder and preorder traversal of tree |
| | |
| 8. | Implement the following data structure techniques: |
| a. | Write a program to insert the element into maximum heap. |
| b. | Write a program to insert the element into minimum heap. |
| 9. | Implement the following data structure techniques: |
| a. | Write a program to implement the collision technique. |
| b. | Write a program to implement the concept of linear probing. |
| | |
| 10. | Implement the following data structure techniques: |
| a. | Write a program to generate the adjacency matrix. |
| b. | Write a program for shortest path diagram. |

|-----------------|--|
| 1. | IPv4 Addressing and Subnetting |
| | a) Given an IP address and network mask, determine other information about the |
| | IP addresssuch as: |
| | Network address |
| | Network broadcast address |
| | • Total number of host bits |
| | • Number of hosts |
| | b) Given an IP address and network mask, determine other information about the IP addresssuch as: |
| | • The subnet address of this subnet |
| | • The broadcast address of this subnet |
| | • The range of host addresses for this subnet |
| | • The maximum number of subnets for this subnet mask |
| | • The number of hosts for each subnet |
| | • The number of subnet bits |
| | • The number of this subnet |
| 2. | Use of ping and tracert / traceroute, ipconfig / ifconfig, route and arp utilities. |
| | |
| 3. | Configure IP static routing. |
| | |
| 4. | Configure IP routing using RIP. |
| | |
| 5. | Configuring Simple OSPF. |
| 6. | Configuring DHCP server and client. |
| 7. 8. | Create virtual PC based network using virtualization software and virtual NIC. Configuring DNS Server and client. |
| <u>ð.</u> 9. | Configuring OSPF with multiple areas. |
| 9. 10. | Use of Wireshark to scan and check the packet information of following protocols |
| 10. | HTTP |
| | • ICMP |
| | • TCP |
| | • SMTP |
| | POP3 |

SEMESTER IV

| B. Sc. (Information Tech | Semester – IV | | |
|-------------------------------------|---------------|----------------------|-------|
| Course Name: Core Java | | Course Code: USIT401 | |
| Periods per week (1 Period is 50 | minutes) | 5 | |
| Credits | 2 | | |
| | | Hours | Marks |
| Evaluation SystemTheory Examination | | 21/2 | 75 |
| | Internal | | 25 |

| Unit | Details | Lectures |
|------|--|----------|
| Ι | Introduction: History, architecture and its components,Java Class File, Java Runtime Environment, The Java Virtual Machine, JVM Components, The Java API, java platform, java development kit, Lambda Expressions, Methods References, Type Annotations, Method Parameter Reflection, setting the path environment variable, Java Compiler And Interpreter, java programs, java applications, main(), public, static, void, string[] args, statements, white space, case sensitivity, identifiers, keywords, comments, braces and code blocks, variables, variable name Data types: primitive data types, Object Reference Types, Strings, Auto boxing, operators and properties of operators, Arithmetic operators, assignment operators, increment and decrement operator, relational operator, logical operator, bitwise operator, conditional operator. | 12 |
| II | Control Flow Statements: The IfElse IfElse Statement, The SwitchCase Statement Iterations: The While Loop, The Do While Loop, The For Loop, The Foreach Loop, Labeled Statements, The Break And Continue Statements, The Return Statement Classes: Types of Classes, Scope Rules, Access Modifier, Instantiating Objects From A Class, Initializing The Class Object And Its Attributes, Class Methods, Accessing A Method, Method Returning A Value, Method's Arguments, Method Overloading, Variable Arguments [Varargs], Constructors, this Instance, super Instance, Characteristics Of Members Of A Class, constants, this instance, static fields of a class, static methods of a class, garbage collection. | 12 |
| Ш | Inheritance: Derived Class Objects, Inheritance and Access Control, Default Base Class Constructors, this and super keywords. Abstract Classes And Interfaces, Abstract Classes, Abstract Methods, Interfaces, What Is An Interface? How Is An Interface Different From An Abstract Class?, Multiple Inheritance, Default Implementation, Adding New Functionality, Method Implementation, Classes V/s | 12 |

| | Interfaces, Defining An Interface, Implementing Interfaces. | |
|----|---|----|
| | Packages: Creating Packages, Default Package, Importing Packages, | |
| | Using A Package. | |
| IV | Enumerations, Arrays: Two Dimensional Arrays, Multi-Dimensional Arrays, Vectors, Adding Elements To A Vector, Accessing Vector Elements, Searching For Elements In A Vector, Working With The Size of The Vector. Multithreading: the thread control methods, thread life cycle, the main thread, creating a thread, extending the thread class. Exceptions: Catching Java Exceptions, Catching Run-Time Exceptions, Handling Multiple Exceptions, The finally Clause, The throws Clause Byte streams: reading console input, writing console output, reading file, writing file, writing binary data, reading binary data, getting started with character streams, writing file, reading file | 12 |
| V | Event Handling: Delegation Event Model, Events, Event classes, Event listener interfaces, Using delegation event model, adapter classes and inner classes. Abstract Window Toolkit: Window Fundamentals, Component, Container, Panel, Window, Frame, Canvas.Components – Labels, Buttons, Check Boxes, Radio Buttons, Choice Menus, Text Fields, Text, Scrolling List, Scrollbars, Panels, Frames Layouts: Flow Layout, Grid Layout, Border Layout, Card Layout. | 12 |

|------|--|----------|
| I | Introduction: What is software engineering? Software Development Life Cycle, Requirements Analysis, Software Design, Coding, Testing, Maintenance etc. Software Requirements: Functional and Non-functional requirements, User Requirements, System Requirements, Interface Specification, Documentation of the software requirements. Software Processes: Process and Project, Component Software Processes. Software Development Process Models. Waterfall Model. Prototyping. Iterative Development. Rational Unified Process. The RAD Model Time boxing Model. Agile software development: Agile methods, Plan-driven and agile development, Extreme programming, Agile project management, Scaling agile methods. | 12 |
| II | Socio-technical system: Essential characteristics of socio technical systems, Emergent System Properties, Systems Engineering, Components of system such as organization, people and computers, Dealing Legacy Systems. Critical system: Types of critical system, A simple safety critical system, Dependability of a system, Availability and Reliability, Safety and Security of Software systems. Requirements Engineering Processes: Feasibility study, Requirementselicitation and analysis, Requirements Validations, Requirements Management. | 12 |

| r | | |
|-----|---|----|
| | System Models: Models and its types, Context Models, Behavioural | |
| | Models, Data Models, Object Models, Structured Methods. | |
| III | Architectural Design: Architectural Design Decisions, System Organisation, Modular Decomposition Styles, Control Styles, Reference Architectures. | |
| | User Interface Design: Need of UI design, Design issues, The UI design Process, User analysis, User Interface Prototyping, Interface Evaluation. | 10 |
| | Project Management | 12 |
| | Software Project Management, Management activities, Project Planning, Project Scheduling, Risk Management. | |
| | Quality Management: Process and Product Quality, Quality assurance and Standards, Quality Planning, Quality Control, Software Measurement and Metrics. | |
| IV | Verification and Validation: Planning Verification and Validation, Software Inspections, Automated Static Analysis, Verification and Formal Methods. Software Testing: System Testing, Component Testing, Test Case Design, Test Automation. Software Measurement: Size-Oriented Metrics, Function-Oriented Metrics, Extended Function Point Metrics Software Cost Estimation:Software Productivity, Estimation Techniques, Algorithmic Cost Modelling, Project Duration and Staffing | 12 |
| V | Process Improvement: Process and product quality, Process Classification, Process Measurement, Process Analysis and Modeling, Process Change, The CMMI Process Improvement Framework. Service Oriented Software Engineering: Services as reusable components, Service Engineering, Software Development with Services. Software reuse: The reuse landscape, Application frameworks, Software product lines, COTS product reuse. Distributed software engineering: Distributed systems issues, Client–server computing, Architectural patterns for distributed systems, Software as a service | 12 |

| | | | | Hours | Mai | rks |
| Evaluation System | | Practical Examination | ion | 2 ¹ / ₂ | 50 |) |
| | | | | | | |

| List of | Practical |
|---------|---|
| 1. | Java Basics |
| a. | Write a Java program that takes a number as input and prints its multiplication |
| 1- | table upto 10. |
| b. | Write a Java program to display the following pattern. |
| | **** |
| | *** |
| | ** |
| | * |
| с. | Write a Java program to print the area and perimeter of a circle. |
| | |
| 2. | Use of Operators |
| a. | Write a Java program to add two binary numbers. |
| b. | Write a Java program to convert a decimal number to binary number and vice |
| | versa. |
| с. | Write a Java program to reverse a string. |
| | |
| 3. | Java Data Types |
| a. | Write a Java program to count the letters, spaces, numbers and other characters of an input string. |
| b. | Implement a Java function that calculates the sum of digits for a given char array |
| | consisting of the digits '0' to '9'. The function should return the digit sum as a long |
| | value. |
| с. | Find the smallest and largest element from the array |
| | |
| 4. | Methods and Constructors |
| a. | Designed a class SortData that contains the method asec() and desc(). |
| b. | Designed a class that demonstrates the use of constructor and destructor. |
| c. | Write a java program to demonstrate the implementation of abstract class. |
| | |
| L | |

| 5. | Inheritance |
|-----|---|
| a. | Write a java program to implement single level inheritance. |
| b. | Write a java program to implement method overriding |
| с. | Write a java program to implement multiple inheritance. |
| | |
| | |
| 6. | Packages and Arrays |
| a. | Create a package, Add the necessary classes and import the package in java class. |
| b. | Write a java program to add two matrices and print the resultant matrix. |
| с. | Write a java program for multiplying two matrices and print the product for the |
| | same. |
| | |
| 7. | Vectors and Multithreading |
| a. | Write a java program to implement the vectors. |
| b. | Write a java program to implement thread life cycle. |
| с. | Write a java program to implement multithreading. |
| | |
| 8. | File Handling |
| a. | Write a java program to open a file and display the contents in the console |
| | window. |
| b. | Write a java program to copy the contents from one file to other file. |
| с. | Write a java program to read the student data from user and store it in the file. |
| | |
| 9. | GUI and Exception Handling |
| a. | Design a AWT program to print the factorial for an input value. |
| b. | Design an AWT programto perform various string operations like reverse string, |
| | string concatenation etc. |
| с. | Write a java program to implement exception handling. |
| | |
| 10. | GUI Programming. |
| a. | Design an AWT application that contains the interface to add student information |
| | and display the same. |
| b. | Design a calculator based on AWT application. |
| с. | Design an AWT application to generate result marks sheet. |
| | |

| | | Hours | Marks |
| Evaluation System | Practical Examination | 21/2 | 50 |
| | | | |

| List of Practi | cal | | | |
|----------------|---|--|--|--|
| 1. | Design and develop a reprogrammable embedded computer using 8051 microcontrollers and to show the following aspects. a. Programming b. Execution c. Debugging | | | |
| | | | | |
| 2. A | Configure timer control registers of 8051 and develop a program to generate given time delay. | | | |
| В | To demonstrate use of general purpose port i.e. Input/ output port of two controllers for data transfer between them. | | | |
| | | | | |
| 3. A | Port I / O: Use one of the four ports of 8051 for O/P interfaced to eight LED's. Simulate binary counter (8 bit) on LED's | | | |
| В | To interface 8 LEDs at Input-output port and create different patterns. | | | |
| С | To demonstrate timer working in timer mode and blink LED without using any loop delay routine. | | | |
| | | | | |
| 4. A | Serial I / O: Configure 8051 serial port for asynchronous serial communication with serial port of PC exchange text messages to PC and display on PC screen. Signify end of message by carriage return. | | | |
| В | To demonstrate interfacing of seven-segment LED display and generate counting from 0 to 99 with fixed time delay. | | | |
| С | Interface 8051 with D/A converter and generate square wave of given frequency on oscilloscope. | | | |
| | | | | |
| 5. A | Interface 8051 with D/A converter and generate triangular wave of given frequency on oscilloscope. | | | |

| B | Using D/A converter generate sine wave on oscilloscope with the help of lookup table stored in data area of 8051. |
|-----|--|
| 6. | Interface stepper motor with 8051 and write a program to move the motor through a given angle in clock wise or counter clock wise direction. |
| 7. | Generate traffic signal. |
| | |
| 8. | Implement Temperature controller. |
| 9. | Implement Elevator control. |
| 10. | Using FlashMagic |
| Α | To demonstrate the procedure for flash programming for reprogrammable embedded system board using FlashMagic |
| В | To demonstrate the procedure and connections for multiple controllers programming of same type of controller with same source code in one go, using flash magic. |

| List of 1 | Practical |
|-----------|---|
| 1. | Solve the following: |
| a. | Study and enlist the basic functions used for graphics in C / C++ / Python |
| | language. Give an example for each of them. |
| b. | Draw a co-ordinate axis at the center of the screen. |
| 2. | Solve the following: |
| a. | Divide your screen into four region, draw circle, rectangle, ellipse and half ellipse |
| | in each region with appropriate message. |
| b. | Draw a simple hut on the screen. |
| 3. | Draw the following basic shapes in the center of the screen : |
| | i. Circle ii. Rectangle iii. Square iv. Concentric Circles v. Ellipse vi. Line |
| 4. | Solve the following: |
| a. | Develop the program for DDA Line drawing algorithm. |
| b. | Develop the program forBresenham's Line drawing algorithm. |
| 5. | Solve the following: |
| a. | Develop the program for the mid-point circle drawing algorithm. |
| b. | Develop the program for the mid-point ellipse drawing algorithm. |
| 6. | Solve the following: |
| a. | Write a program to implement 2D scaling. |
| b. | Write a program to perform 2D translation |
| | |

| 7. | Solve the following: |
|-----|---|
| a. | Perform 2D Rotation on a given object. |
| b. | Program to create a house like figure and perform the following operations. |
| | i.Scaling about the origin followed by translation. |
| | ii. Scaling with reference to an arbitrary point. |
| | iii. Reflect about the line $y = mx + c$. |
| | |
| | |
| 8. | Solve the following: |
| a. | Write a program to implement Cohen-Sutherland clipping. |
| b. | Write a program to implement Liang - Barsky Line Clipping Algorithm |
| | |
| 9. | Solve the following: |
| a. | Write a program to fill a circle using Flood Fill Algorithm. |
| b. | Write a program to fill a circle using Boundary Fill Algorithm. |
| | |
| 10. | Solve the following: |
| a. | Develop a simple text screen saver using graphics functions. |
| b. | Perform smiling face animation using graphic functions. |
| с. | Draw the moving car on the screen. |
