## AQUALUNA

### ABOUT THEME

The AQUALUNA is a vast, mysterious realm teeming with life and wonder. It is divided into zones, from the sunlit surface to the pitch-black depths, each hosting unique ecosystems. Coral reefs burst with vibrant life, while the deep sea harbors strange, bioluminescent creatures adapted to immense pressure and darkness. Underwater landscapes range from towering mountains and trenches to hydrothermal vents that support exotic species. The ocean is crucial to Earth's balance, producing oxygen, absorbing carbon, and sustaining countless species, including humans. Despite its importance, much of it remains unexplored, a frontier filled with secrets waiting to be uncovered.

# FEVER PITCH

A stylized illustration of a whale breaching the ocean surface. The whale is dark blue with lighter blue stripes along its back. The water is depicted with various shades of blue and green, showing ripples and small fish. The overall style is graphic and artistic.
